

## I can watch what other children are doing before I join in with them

What should the adult do?	What other skills does this activity help with?
<p>Action songs are a great way to develop this skill, watch and listen together then join in together. Name the action and talk about what you are doing, for example clapping your hands "If we move our hands fast and touch them together in front of us, we can make that clapping sound"</p>	<p>Physical Development - moving and handling                      Communication - listening and attention &amp; understanding                      Expressive arts - exploring music and singing favourite songs</p>
